INTRODUCTION

Twenty seven years experienced engineers team developed this company the name of RP CONSTRUCTION, Chennai & Hosur. Past 7 years the company was developed with honesty & truthfully. We construct an all kinds of buildings, individual houses and PEB structure work. At the same time we design all kinds interior works also.

Hello, all! This is **Palanivel, B.E.**, the Director of RP Construction, I have started my career in Pondicherry-Senthilnathan construction (Rajiv Gandhi Dental College project and other 5 years), Chennai-Vijayshanthi Builders Ltd (Project manager-15years) and KG Foundation P. Ltd (Sr. Project Manager - 1 ½ Years) after completing my Engineering. And as an individual, I'm extremely self-motivated. I feel honored to say that, I had an expert who guided me through all the difficulties in the Real Estate Industry and Construction. With almost a decade's experience in this industry, I could proudly say that I have seen it all. The Real Estate and Construction experience I got is matchless and I would only thank my clients with whom I have worked and have done the business for this exposure I have acquired. Coming from a professional background, I have learnt the ability to see and understand the client's needs and to offer businesses that will always be a profitable investment.

Civil construction is treated in a number of articles. Building construction is an ancient human activity. It began with the purely functional need for a controlled environment to moderate the effects of climate. Building construction today is a significant part of industrial culture, a manifestation of its diversity and complexity and a measure of its mastery of the diverse needs of society. This article first traces the history of building construction, the surveys its development at the present time. For treatment of the aesthetic consideration of building design.

Interior design is an art that involves colors, form and designing concepts to excellent room or a location. It have hues and shades of nature to generate a wider meaning into the enclosed space for day-to-day used in life.

Our Services:

PEB Shed Construction, Residential, Commercial & Industrial | Planning |
Estimation & Costing | 3D Modeling Elevation | PMC for Project | Single Documentation

VISION OF OURS

- There are a lot of technical aspects involved in Civil & Interior design.
- A design professional will help you strike the right balance between your lifestyle, tastes, project requirements and parameters such as your budget.
- Ask yourself if you are comfortable with the designer's personality and whether or not you feel he/she will be sensitive to yours needs right from the start.
- Do not get caught up in the so-called styles of professionals, as a trained designer should be able to work in a variety of styles.
- As a client, you have the right of final approval before and design is executed or purchases are made.
- The importance of open communication between client and designer cannot be stressed enough. Your trust and honest input is crucial.
- Be realistic about the project budget.
- Even the best designers have shortcomings, and you need to be considerate and patient.
- Suggestion is our next improvement.
